

Lely Calm calf feeder – peace of mind to rearing

Anyone in pursuit of a sustainable cow with a high lifetime production must first optimize the rearing of young cattle. The Lely Calm automatic calf feeder guarantees the optimal growth and development of these young animals. Calves can still enjoy their natural behaviour and drink whenever they want, in a controlled way, while labour is reduced to the minimum.

Perfect overview

The Calm calf feeder gives you the flexibility to check the performance of the calves whenever you want. The Lely Calm can be connected to Lely's T4C advanced management programme, giving you a clear overview and ease of control of all your calves through your PC. It also allows you to generate reports and graphs of milk rations per calf. You can choose for feeding only fresh milk, only powder milk or a combination of both.

Key benefits

- Time saving.
- Quicker growth rate.
- Better rumen development.
- Labour flexibility.
- Individual calf management.
- Stable and exact milk temperature.
- Flexible feeding schedules.
- Weaning without stress.
- Suitable for all farm sizes.

"It's just a joy to rear calves on a Lely calf feeder and it fits well into my daily routine."
